

Improve Patient Experience and Quality of Care

Patients who have a positive experience are more likely to stay engaged with their health care.¹ Use these tips to help guide your patient engagement approach and improve CAHPS scores.

Patient experience matters	
Strengthen patient loyalty	A high-quality relationship between patient and provider can greatly affect patient loyalty to your practice.
Improve patient engagement and clinical outcomes	Positive patient experience led to higher adherence to medical advice and treatment plans. ¹ Engaged patients are more likely to take charge of their care plan and stay up-to-date with their care.
Uphold reputation	Satisfied and content patients are likely to share their experience with others. Positive reviews can also lead to new patient referrals to your practice.

What is the CAHPS survey?

- The Consumer Assessment of Healthcare Providers and Systems (CAHPS) survey is an annual health care experience survey that:
 - Asks patients to evaluate their experience with their providers and health plan (i.e. access to care, provider communication, customer service, ease of getting Rx).
 - Includes select Healthcare Effectiveness Data and Information Set (HEDIS®) quality measures.²
- Administered annually each spring via mail and phone.
- Results help identify opportunities for patient experience improvement.
